OF LONDON**

Managing the Company of the Future

Julian Birkinshaw

Week 5

From firm to individual: The changing role of the manager

Reinventing the
System of
Management

Rethinking the Role
of the Manager

Think back to the last piece of work you did where you were fully engaged and highly motivated:

What were the key features of that activity?

Most people are engaged and motivated when:

- **The work is challenging**
 - **They are given freedom to do it their way**
 - **When it seems to be important**
 - **When working with good colleagues...**
-

Now imagine your role as a manager:

How should you act if you want your employees to be engaged and motivated?

Summary: What is good management?

What your employees need

Give them worthwhile work, a clear sense of direction

Provide them with space to find their own way

Provide support when it is needed

Give people recognition & praise

The changing role of the manager (Recall the discussion in week 1)

**INDUSTRIAL
ERA**

**Monitor
and
Controller**

**“KNOWLEDGE
ERA”**

**Information
Conduit and
Expert**

**“POST
KNOWLEDGE ERA”**

**Implementer
and
Empathiser**

*The key roles of the
manager in the future*

A shift in emphasis over time

**Traditional
companies**

*Transparency
Automation
Expectation*

**Modern
companies**

Summary: What is good management?

What your employees need

Worthwhile work,
a clear sense of direction

What they often get

Confusing or unclear
objectives

Space to find their
own way

Micro-management and
meddling

Support when it is needed

Lack of information, lack
of concern

Recognition & praise

Limited feedback and
little praise

Why don't we do
what the books tell us to do?

MANAGING

If we know what “good management” looks like in the company of today/tomorrow, why do we struggle to do it consistently?

An employee's eye view of managing

Two ways of thinking about management

What do we want
to get done?

How do we need to
act to get our
employees to do it?

How should we act to
harness their latent
enthusiasm and skill?

What aspirations, fears,
concerns do employees
experience at work?

UNDERCOVER BOSS

Learn how to see the world through the eyes of our employees

Some tips for getting to know your employees properly

1. **Skip-level meetings**
 2. **Web-enabled discussion forums**
 3. **Front-line work**
 4. **“Smokers corner”**
 5. **Reverse mentoring**
-

Understanding our biases: Managing as an unnatural act

What is stopping us from doing
what we know we should?

**Making sense of the
human mind:**

**The rational
(conscious) part**

**The emotional
(subconscious) part**

Managers face inherent conflicts in their day-to-day work

**Give freedom and
recognition to others,
share information
widely**

**Take charge, avoid
errors, remain in
control**

Learn to let go

Tony Blair gave the Bank of England freedom from political interference when he became Prime Minister

Package work into projects

La Sagrada Familia, Barcelona

“Gaudí gave artistic freedom to those working alongside him. Even when he was in charge, there were 40 different sculptors working for him. Gaudí inspired them, intervened and commented on their work — but it remained the work of several different sculptors.” Jordi Bonet

Seek Advice

You need impartial feedback to improve your skills

Focus on your strengths

How do I change my own way of working?

What do knowledge workers spend their time on?

Our research shows that desk-based work and “managing across” take up two-thirds of knowledge workers’ time, on average...

TIME SPENT ON ACTIVITIES

What do knowledge workers spend their time on?

...and yet those tasks were rated as most easily off-loaded and tiresome.

How to make time for the work that matters

1. Identify low value tasks
 2. Decide what to drop, delegate or redesign
 3. Commit to your plan
 4. Off-load tasks
 5. Allocate freed-up time
-

A personal management experiment

Hypothesis: A greater emphasis on 'coaching' will increase the effectiveness of my team

Before

Traditional
style of
supervision
of team

After

Supervisor spends 5 hours
more per week providing
feedback and coaching
team

Result: Team
members more
engaged,
increase in sales
numbers

Intervention: Supervisor has 5
hours per week freed up, team are
asked to increase cross-selling

What will the company of the future look like?

The Limited Liability Corporation (“PLC”)

- Exists as a legal entity, ownership separated from control
 - Enabled spread of capitalism, investment in promising opportunities, rise of professional management
 - But increasingly seen as favouring short-term and narrow thinking
-

Some alternative models of ownership

- Private Equity (e.g. Blackstone, TPG)
- Family (e.g. IKEA, Mars)
- Cooperative (e.g. Nationwide, Arla)
- Trust (e.g. Tata Sons, John Lewis)
- Partnership (e.g. Deloitte, Freshfields)

These alternatives are typically more long-term oriented than the PLC, though each has pros and cons. Some PLCs are seeking to learn from these models.

Alternative models of *organising*

- Decentralised
- Networked
- Virtual
- Internal markets
- Bottom-up

Alternative models for the *employment relationship*

- Individual in salaried employment
 - Full-time or part-time
 - Individual as freelance contractor
 - Sells services for a fee
 - Works for one, several, or many companies
-

Worked example

- Eden McCallum is a London-based strategy consultancy
- Core team: 12 partners and 20 salaried staff
- Work is done by a pool of 500 freelance consultants
- Read the case study in the course-room and discuss:
What are the pros and cons for Eden McCallum in having its consultants as freelancers not salaried employees

- Many companies are experimenting with alternatives to the traditional model:
 - Different ownership structures
 - Different ways of organising
 - Different approaches to employment
 - While large traditional companies will continue to exist, there will be more freelancers and more smaller companies selling their services to large companies
-

The changing nature of work

Will there still be “jobs” ten years from now?

In addition to changes in the companies we work for, we can also expect changes in:

1. The nature of the work we do
 2. Where we do our work, and the hours we keep
 3. How work varies over our working lives
-

Drivers of change revisited

The nature of the work we do

1. Technology is *automating* many traditional jobs
2. Many jobs are being *outsourced* to emerging economies

In developed economies, the work least under threat is service/client based, or involves high levels of collaboration

Where we work, and the hours we keep

1. Technology allows us to work virtually
2. Gen Y employees expect greater freedom
3. Sustainability concerns make commuting and city work less attractive

These trends are pushing more *flexible* ways of working. However, there are still important benefits to physical colocation for many types of work

How work varies over our working lives

1. Gen Y expect to work for many companies and/or themselves over their working lives
2. Gen Y expect meaningful work, often linked to a sustainability agenda

Some companies are experimenting with less traditional career structures

Individuals are increasingly experimenting with portfolio careers

Concluding Thoughts

Two different views of the future

Same as it ever was

Radically different

Forces for stasis

Forces for change

Two different views of the future

**Traditional management
model - bureaucratic
principles**

**Large companies, a few
freelancers**

Office-based work

**Company takes charge
of your career**

Forces for stasis

**Alternative management
model – emergent
principles**

**Mix of large, small and
freelancers**

Many virtual workers

**You take charge of your
own career**

Forces for change

Two different views of the future

**CONFORMITY
TO EXTERNAL
NORMS**

**COURAGE TO
EXPLORE NEW
POSSIBILITIES**

Forces for stasis

Forces for change
